Founder

About Village 88 Training

Village 88 Training is designed to help you level up your coding skills in just 16 weeks and get hired faster by companies of your choice.

The training program we are offering to the world through Coding Dojo is now offered exclusively to Filipinos for a reasonable price: **YOUR COMMITMENT.**

Since offering the training in 2020, our alums now work in 25 companies in the Philippines and get hired within two months after graduating.

Great companies hire Village 88 alums

Career Preparation and Graduation

You will be eligible to graduate after you complete all your assignments and capstone projects and receive your e-certificates from Proficiency Exams per track.

You are expected to participate in the Career Preparation, where you will learn to write an excellent resumé and build an outstanding portfolio through Village 88 Resumé Workshop.

Career Matching

You will have endless opportunities after completing Village 88 Training. Top Alums may be offered a full-time position in Village 88 or be invited to join our alumni network, where we will help you be matched with our local and international partner companies as junior developers.

You won't have to pay anything if you're committed to finishing the 16-week training, but if you signed Bond Agreement form and quit by Week 3 onwards, you will have to pay Php 30,000.

After the training, you may also be offered a full-time position in the company or be invited to join our talent pool for our Network, where you could be matched with our local and international partner companies.

Village 88 Training is offered free to Filipinos residing in the Philippines, but non-Filipinos and Filipinos living outside the Philippines can join the training program if you're willing to pay \$10,000.

Kim David Ritardo

MAJAYJAY, LAGUNA

"At first, I thought my programming skills were good enough, but when I entered Village88 training, I realized that my "best" could be much better. I've enjoyed doing a lot of activities here; the mentors are professional, and the lessons are simplified for better learning. They will nurture your programming skills to the next level and your soft skills."

Joshua Gabriel Roxas

BENGUET

"Training in Village 88 is one of the best training that I experienced. It helped me build the skills that I need to apply to any company that I want. After the training, I became a Full-stack developer at Hapi Healthcare UK and Web Developer at DeDesign."

Philip Campani

CAVITE

"At first, I thought it was impossible to make a huge shift in my career. From being a seafarer, I am now a software developer with the help of Village88. The training has helped me a lot in leveling up as a programmer."

FAQS

Answers to Your Frequently Asked Questions

Why are you going to charge me Php30,000 if I quit by Week 3 onwards?

Our team spent tremendous time and effort to help developers become industry-ready. Our training program (material, platform, instructor service, etc.) would typically cost \$16,000.00. Still, we offer free training to those willing to commit and make sacrifices to complete Village 88 Training.

We want committed aspiring developers who will complete the Village 88 Training and won't give up when things become difficult halfway through the training.

What are the requirements?

Village 88 Training is offered exclusively to Filipinos with coding background residing in the Philippines. We have forms you need to fill out and submit. You will be expected to have an internet connection and a PC/Laptop with a mic and camera good for conference calls and coding.

For OJT applicants, kindly submit complete OJT documents at the start or during the training (such as recommendation letters, etc.)

Are there career opportunities after the training?

We have Career Matching Services. After the training, you may be offered a full-time position in Village 88 or be invited to join our alumni network, where we could match you with our partner companies.

I'm not a CS/IT graduate. Can I still apply? Do I need to have programming experience?

Career-shifters and individuals without CS/IT-related degrees are welcome to apply if they have a background in coding or programming.

Can I still apply if I have a full-time job?

We don't advise full-time employees to apply for the training since trainees from past batches with full-time jobs had difficulty catching up with lessons. Again, the Village 88 Online Training Program is extensive and rigorous, but if you think you can manage full-time work and attend the training without quitting halfway, you are still welcome to apply.

Can I apply as an intern for my college OJT requirement?

Yes, the training can be credited as your undergrad OJT. You will receive a Certificate of Completion after the required weeks and outputs, regardless of hours spent. However, you will be trained to limited technologies only as OJT.

Application Process

1

Registration

Fill out our Village 88 Training Form to apply. Your application will undergo initial screening. Our team will email you the result of whether you passed or failed the screening within 24 hours after submitting your application.

2

Pre-training Homework

If you pass the screening, you will be expected to do some activities while you wait for the training to start. We'll email you the details. Typically, it takes 1-2 weeks to complete.

3

Start of the Training

We kickstart the training with an orientation meeting. You will be required to attend our daily Zoom sessions at 8 am, which usually last for one and a half hours.

Kindly prepare your peripherals (mic and camera). Your participation during our sessions is anticipated and appreciated.
